

# Outpatient Burn and Wound Care Center

## Comprehensive services, convenient location

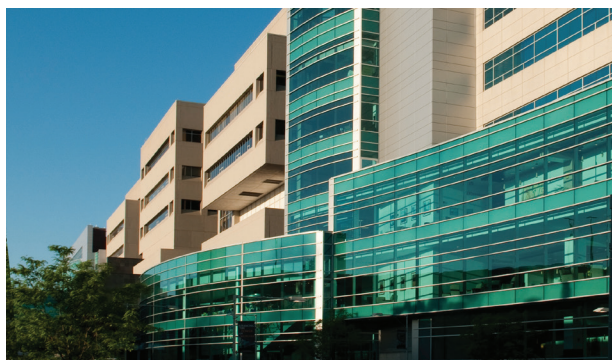

In the Outpatient Burn and Wound Care Center, we recognize the complexity of burn and wound care, as well as the physical and physiological strain these injuries can cause. Our highly specialized team of professionals offers the most advanced, comprehensive care to adult and pediatric patients with complex wounds and burns, who need ostomy care or may benefit from hyperbaric oxygen therapy.

### Wound care

Our wound care center is dedicated to providing expert care to patients with various wounds. Our multidisciplinary team includes board-certified physicians and wound-certified clinical staff who are experienced and highly trained in the care and management of complex wounds.

#### Services include care for:

- Wounds
  - Acute
  - Chronic
  - Infected
  - Ischemic
  - Surgical – non-healing
  - Atypical – cancerous
- Ulcers
  - Diabetic foot
  - Arterial
  - Venous
  - Pressure

### Burn care

The Outpatient Burn and Wound Care Center is an extension of our Burnett Burn Center, the only adult and pediatric burn care facility in the region that is verified by the American Burn Association and the American College of Surgeons.

#### Services include:

- Advanced care for thermal, chemical and electrical burns
- Rehabilitation therapy
- Scar management
- Specialty support from other hospital related services
- Patient and family education and support
- Burn Survivors Support Group for survivors and peer support

#### Convenient Location

Hours 8 a.m.-5:30 p.m. Monday-Friday

Outpatient Burn and Wound Care Center  
and Hyperbaric Medicine Services  
The University of Kansas Hospital  
Ground floor in G567 (From the main entrance, go  
past the lobby and turn right.)

## Advanced treatment therapies for burn and wound care

### Hyperbaric oxygen therapy

This advanced therapy uses pressurized, pure oxygen to increase the amount of oxygen in the patient's blood stream and enhance healing.

Our state-of-the-art, individual hyperbaric oxygen chambers provide effective treatment for a range of acute conditions and complex wounds, including:

- Acute carbon monoxide poisoning
- Arterial gas embolism
- Chronic refractory osteomyelitis
- Clostridial myonecrosis
- Compartment syndrome
- Compromised skin grafts/skin flaps
- Crush injury
- Decompression sickness
- Diabetic foot ulcer
- Necrotizing fasciitis
- Osteoradionecrosis
- Radiation cystitis
- Radiation proctitis
- Radiation vaginitis
- Soft tissue radionecrosis

**To refer a patient, call 913-588-5862 or toll free 877-588-5862. Or visit [kumed.com/referral](http://kumed.com/referral).**

### Ostomy care

Our outpatient ostomy care team provides patients with long-term essential care from a certified ostomy care nurse.

Our specialists provide care for every stage of the ostomy process:

- **Perioperative visits** – In addition to preparing for surgery and stoma site marking, we help you adjust to life with an ostomy and address your medical, social and emotional concerns.
- **Postoperative visits** – We offer follow-up care and education to help you cope as you recover and adjust to changes in your daily life.
- **Long-term maintenance and support** – We provide guidance for patients who have lived for years with an ostomy. Our staff supports you through any medical, social and emotional issues related to your condition.
