Citrix StoreFront

LOGIN

Citrix is the secure environment for accessing health system applications remotely. To access Citrix using your browser, go http://access.kumed.com/ and log on using your network username and password. You will no longer be prompted to choose either the KUHA or KUMC domains. This now defaults to a new single authentication domain for all users named UKHMC. The KUHA or KUMC options have been removed. After login you will be prompted to complete Multi-Factor Authentication.

		We account. In addition to your normal credentials, you'll also need to provide an authentication code when logging in. You can use a mobile app to provide the code automatically, or receive a one-time code by text message or phone call.
		Setup MFA

NAVIGATION

Citrix StoreFront is the latest available technology for browser-based access to Citrix. When you first log in to **StoreFront** you will land on a page called **Favorites**. This page will contain only a few of the total applications you have available to you. These are icons that were designated as default **Favorites** for all users or icons that you, as a user, set as a favorite.

Citrix StoreFront

You will see in the ribbon at the top that you can also navigate from **Favorites** to either **Desktops** (if any are assigned to you) or **Apps**. Under **Apps** you will find all other applications available to you.

If you click the **Details** link next to any of those apps. you can then click **Add To Favorites** and that icon will show up on your **Favorites** tab going forward.

In the upper left of the page you will also see two links, **All** and **Categories**. **All** is the default and will show you all apps in a single window. If you click **Categories**, you will see the apps organized into the folders you are used to seeing when accessing Citrix via the browser.
