

See Our Labor and Delivery Suites

The University of Kansas Health System is a leader in safe deliveries. Labor and delivery suites are decorated in warm, soothing earth tones and include window views of the Kansas City skyline.

Large bathrooms feature spacious showers with room to sit.

Our care is centered around your family. We encourage your partner and other support persons to be part of your pregnancy and birth experience with comfortable, convenient surroundings.

When possible, postpartum and newborn care are offered in the same room by the same caregivers.
