

# How to find your hostname

1. Right click on the Start button in the lower left-hand corner of your screen

2. Click on the word System.

### 3. Find where it says "Device Name" and that is the Hostname of your computer

The screenshot shows the Windows Settings application, specifically the 'About' page. A large red arrow points from the top of the page down to the 'Device name' field in the 'Device specifications' section. The 'Device name' field contains the text 'Example' and is circled in red. The 'Device specifications' section lists various system details, and the 'Windows specifications' section lists OS details. The left sidebar shows the 'About' option selected.

**Device specifications**

Device name	Example
Processor	Intel(R) Core(TM) i5-8565U CPU @ 1.60GHz 1.90 GHz
Installed RAM	8.00 GB (7.81 GB usable)
